Creative Computing Club
2017 Attendee Questionnaire

Creative Computing Club CIC provides technology based learning opportunities for all ages and abilities to participants in Suffolk. It delivers courses on computer programming, video game design, hardware programming, web development, electronics, robotics and more. Founded in 2012 the Creative Computing Club has helped hundreds of young people take their first steps in to the world of technology.

The Creative Computing Club is community interest company, therefore the positive impact we have on young peoples lives, the educational and social opportunities we provide them are of more to us than generating a profit.

Our ethos is simple, 50% work 50% play and this is where we are after 5 years of working with young people.

Please Note:
Out of 39 young people that attend Creative Computing Club on a regular weekly basis, 14 did not take part in the questionnaire either due to; being under the age of 12 (9), not attended a full course (4) or unavailable to take the survey (1). Those that took part in the questionnaire were aged 12 and older which is the core focus of the Creative Computing Club. Therefore we feel this summary of the questionnaire is representative of the current Creative Computing Club members , their views and experiences.
